

Dr. Fabian Kohlmann

Managing Director & CEO

GDAC-SA Tender Role: Managing Director & CEO | Former Halliburton ThermoChronology Product Lead | **Global PaleoDEM Development Expert**

Current Position

Managing Director & Head of Data Geosciences

Lithodat Pty Ltd | Melbourne, Victoria, Australia

January 2020 - Present (6 years)

- CEO of company founded in June 2018 by international senior geologists, data scientists and developers
- Vision: Provide resource industry with geospatial geoscientific databases and analytics
- Industry-recognized leader in **thermochronological datasets and thermal histories**
- Shareholding: 550 Class A shares, fully paid, beneficially held

Previous Lithodat Role

Director & Head of Data Geosciences

Lithodat Pty Ltd

February 2019 - January 2020 (1 year)

- Supervising development of new techniques and databases for resource industries
- Leading team of experienced geo- and data scientists to create unique geo-data products
- Managing Lithodat's product portfolio for mining, oil & gas, and aggregate industries
- Liaising with industry and academia to deliver state-of-the-art products
- Client support and gathering feedback on products

Core Expertise

- | | |
|------------------------------------|--------------------------|
| • Thermochronology & Geochronology | • Earth System Modelling |
| • Data Geosciences | • GIS & Geoprocessing |
| • Paleoreconstructions | • Product Leadership |

Key Professional Experience

Senior Geoscientist - Thermochronology & Thermal Histories Product Lead

Halliburton | Abingdon, UK

February 2017 - November 2018 (1 yr 10 mos)

- Product lead of Halliburton's Thermochronology & Thermal Histories (TTH) offering
- Managed development and maintenance of TTH database front-end and back-end
- Supervised staff in data entry and interpretations
- Mentored and trained staff in thermochronology for exploration and thermal history modelling
- Delivered multiday training courses in geochronology, Source-to-Sink and thermochronology
- External supervisor and mentor of MSc projects on Big Data and Thermochronology (STEPS outreach program)
- Support and R&D of in-house Earth System modelling
- Part of Source-to-Sink team
- Managed release, delivery and support of all TTH products to clients
- Publication and presentation of TTH research, marketing and documentation

Sr. Geodynamics Geoscientist

Halliburton | Abingdon, UK

June 2014 - February 2017 (2 yrs 9 mos)

- Developed Global Paleo Digital Elevation Models from 595Ma to present
- Advanced geoprocessing of exploration data using ArcGIS techniques
- Paleoreconstructions using the Landmark - Neflex Plate Model
- Advising and training staff in thermochronology for exploration and thermal history modeling
- Delivered training courses in Geochronology and Thermochronology
- Support and R&D of in-house Paleoclimate modelling and Earth System Model

Geodynamicist

Neflex Petroleum Consultants Ltd | Abingdon, UK

May 2013 - June 2014 (1 yr 2 mos)

- Responsible for developing PaleoDEMs
- Geoprocessing of exploration data using ArcGIS
- Paleoreconstructions using the Neflex Plate Model

Post-Doctoral Researcher

University of Bergen (UiB) | Bergen, Norway

April 2010 - April 2013 (3 yrs 1 mo)

- Research on thermochronology and exhumation history of the Norwegian Passive margin

Education

Doctor of Philosophy (PhD)

The University of Melbourne | Melbourne, Australia

2005 - 2010 (5 yrs)

- Fission Track Thermochronology Research Group
- School of Earth Sciences

Relevance to GDAC-SA Tender

- **Database Leadership:** Proven track record leading geo-database development at Halliburton and Lithodat
- **Industry-Academia Bridge:** Experience liaising between industry and academia for product development
- **Data Product Management:** Expert in managing and delivering specialized geoscience data products
- **Team Leadership:** Extensive experience supervising and mentoring technical teams
- **Global Perspective:** International experience across **UK, Norway, and Australia**
